The Challenge

How do I access critical business information anytime and anywhere in a secure reliable way in order to maintain productivity and achieve operational efficiency?

Organisations at every level require strong, reliable authentication and network access mechanisms that support workflow and routine business processes without compromising security. In fact, Gartner suggest that "Through 2009, establishing adequate third-party security and privacy safeguards will be the greatest challenge facing CISOs and privacy officers"

Discover

With RSAAccelerateIT, we can help you reduce costs by up to 30% on secure access to sensitive information from your networks, with 24x7 support!

Our security specialists can advise and integrate the latest RSA SecurID® technologies and software updates to make sure your organisation can benefit from collaborative working and accelerate business decisions between your employees, business partners and customers and readily access sensitive corporate information.

Our Enterprise Managed Services division, accredited RSA SecurCare provider, can provide 24x7 support to take away the burden of security administration to reduce costs and release manpower.

Next Steps

Simply get in touch with us through www.scc.com and we will show you how we can optimise accessing sensitive information securely and fast track you to up to 30% cost savings on security and support, with RSAAccelerateIT.

Key Benefits:

- Up to 30% reduced security and support costs
- Authenticated users can use RSA tokens whether local, remote or mobile with secure access anywhere and anytime to sensitive corporate information
