

## Supply Chain Workplace Productivity

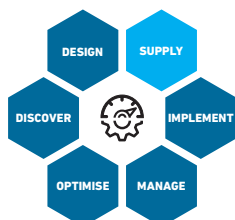

We work with you to reduce the cost of end-to-end IT procurement and associated services, dealing independently with over 1,000 suppliers.

Organisations that have taken end-to-end Lifecycle services have typically minimised costs and maximised performance improvement over their contract period.

### Lifecycle Portal

At a basic level, Lifecycle™ can be configured as a simple catalogue from which the customer purchases equipment online by credit card.

As your business starts to evolve and you begin to take on other services from SCC, we can transition seamlessly to a fully configured account which will provide the complete range of functionality allowing you to raise and track incidents, request installations, view reports and other services.

## Procurement

We work with you to reduce the cost of end-to-end IT procurement and associated services, dealing independently with over 1,000 suppliers. Organisations that have taken end-to-end Lifecycle services have typically minimised costs and maximised performance improvement over their contract period. At a basic level, Lifecycle™ can be configured as a simple catalogue from which the customer purchases equipment online.

## Storage

Our bonded warehousing solution enables you to secure stock against your project requirement and utilise the services of our UK Supply & Recycling Centre. SCC has its own purpose-built dedicated bonded centre to secure customer stock and a huge latent capacity capable of reacting to your urgent demands ensuring your stock management needs meet your project deadlines.

## Configuration

With the capability to bench and build 700,000 devices annually, SCC helps you decrease time-to-desk and place a higher focus on core business activity. Our Configuration Services are suited to any organisation, delivering savings of up to 50% on the cost of configuration to an in-house IT Team and the time it takes to purchase, deploy and configure the new system.

## Secure Logistics

SCC can either use its own transportation or approved secure couriers who are stringently audited to ensure robust security protocols are in place. SCC ensure all couriers operate in accordance to our transportation policies and provide SC Cleared personnel. SCC have the ability to offer various transportation services including a CAS (S) and CPNI approved transportation service for ICT media protectively marked up to TOP SECRET.

## Recycling

For 30 years, we've been trusted to refurbish, remarket and securely dispose of redundant IT, to Government approved security standards handling up to Top Secret classification data. We manage your IT asset disposal risk, turning the burden of compliance into real cost-savings, in accordance with the WEEE Directive, via our award-winning List N accredited National Recycling Centre.

## iMac

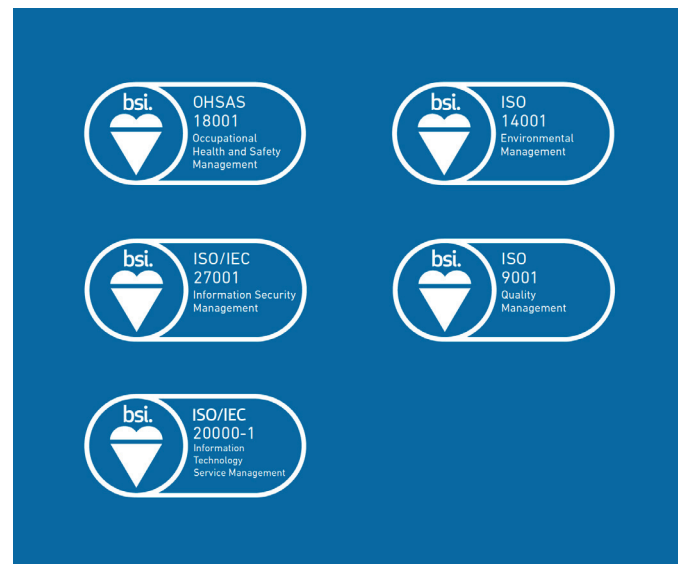

SCC controls installation and manages desktop refresh, supporting both volume and unplanned requests performed outside of normal business hours. Consistent planning is required to reduce costs and ensure tasks are completed efficiently, with flexible resources and knowing exactly how to optimise the right skills for the right tasks.

## Data Security

Our continual investment and commitment to security is reflected within our extensive accreditation portfolio, which has been build up to facilitate the requirements of all sectors. We are NCSC CAS (S) certified, operate CPNI and DIPCOG approved services and have also achieved LIST N certification. Accompanying these sector specific certifications, we also hold ISO 9001, 14001, 20000-1, 27001 and OHSAS 18001. Our fully-accredited List N facility ensures compliance with the latest laws and legislation around IT asset recovery and disposal.

## Accreditations and Awards

We are an ADISA certified ITAD, with two representatives on the ADISA advisory council, and hold ISO9001, 14001, 20000 & 27001 accreditations and OHSAS 18001 certification. Our fully-accredited facility ensures compliance with the latest laws and legislation around IT asset recovery and disposal.
