# We're working to keep you working

How Samsung is helping businesses create cost-effective, manageable solutions for remote working.

COVID-19 is creating unprecedented challenges for all kinds of businesses. With governments around the world asking us to stay home to stay safe, the number of people working remotely has grown exponentially. And while it might not have been a priority in the past, remote working is now something that many organisations are rapidly embracing. At Samsung, we're helping businesses and people adjust to this new way of working using our mobile technology, and giving them access to vital business services and applications.

## Flexible financing to get set up

With Samsung Capital, you can access flexible financing to get the devices you need. There's no upfront cost, just predictable monthly payments, with no surprises.

## Industry-leading mobile technology

Samsung phones and tablets make it easy for you to keep in touch with clients and customers, wherever you're working.

## Samsung DeX

Setting up your own home office is easy with Samsung DeX. Simply connect your device to any monitor using a single cable for a PC-like experience.\* It makes multi-screen working simple and intuitive. And you can still use your phone whilst working on the larger screen. So, you can take calls or check messages while reviewing work, without breaking your focus.

## Microsoft Teams

Staying in touch with colleagues and clients is easy with Microsoft Teams.\*\* You can use the instant messaging feature to talk and stay connected. And the built-in front-facing cameras on Samsung phones and tablets make it easy to host video conferencing calls. So, teamwork doesn't have to suffer. And managing important sales calls and meetings is no problem.

\*USB-C to HDMI cable and accessories sold separately. \*\*Licence required.

## Microsoft Office

With Microsoft Office apps built into Samsung devices, you can easily access your calendars, contacts, emails and documents from your smartphone or tablet. So, you have everything you need to work and stay connected. Plus, with 5GB of free cloud storage, there's plenty of space to store essential files.

## Powerful connectivity

Effective remote working requires good connectivity. That's why the Samsung Galaxy series of devices support Wi-Fi 6, which is 20 percent faster than previous generation Wi-Fi networks. Devices also come with Intelligent Wi-Fi, which lets you switch between Wi-Fi and mobile data, depending on available network strength. And for when Wi-Fi is completely unavailable, Galaxy 5G\*\*\* offers lightning-fast speeds and low latency. All of which means you have the connection you need to keep working.

## An app for everything

In addition to Microsoft and Samsung apps, you can access a wide range of collaboration tools in the Google Play Store—from WhatsApp to Zoom, Hangouts and many others.

## Enterprise Edition

Setting people up to work remotely is even easier with Samsung Galaxy Enterprise Edition. Your IT team can remotely manage, deploy and configure phones and tablets using Knox Configure. There's no need to get 'hands on' with each device—simply ship them to wherever the employee is, and they'll be ready to go, right out of the box.

All Enterprise Edition devices come with 3 years of enhanced support. So, you can access technical support and advice from our UK-based Business Services centre. And should something go wrong with a device, our next business-day replacement service means you can keep downtime to a minimum.\*\*\*\*

## Samsung Knox

Wherever you're working, you can rest assured your information is completely protected. With Samsung Knox defence-grade security built into Samsung devices, all files and data are encrypted to keep them secure.

\*\*\*Enable on 5G devices. \*\*\*\*Doorstep exchange with Samsung gold stock.
