

## EPOS and Microsoft Teams – Premium audio and leading Unified Communication for healthcare professionals

Reliable, plug-and-play audio and video devices from EPOS, coupled with leading collaboration technology from Microsoft Teams, provide healthcare professionals with all the necessary tools to offer patients first class virtual health experiences.

Today's healthcare professionals strive to provide patients with the best possible care, whether this be in person or virtually. Microsoft's solution is to empower healthcare professionals with Microsoft Teams devices. Microsoft Teams enables simple, secure collaboration and communication with chat, video, voice, and healthcare tools in a single hub that supports compliance with HIPAA, HITECH, and other regulations.

EPOS and Microsoft's products work together to provide secure messaging for care teams, optimized collaboration and increased productivity regardless of location.

EPOS headsets and audio tools are certified for Microsoft Teams, allowing healthcare professionals to:

- Enjoy ease of access to communication with a dedicated Microsoft Teams button
- Experience premium sound quality across a variety of settings
- Strengthen communication and collaboration to help provide the best possible care

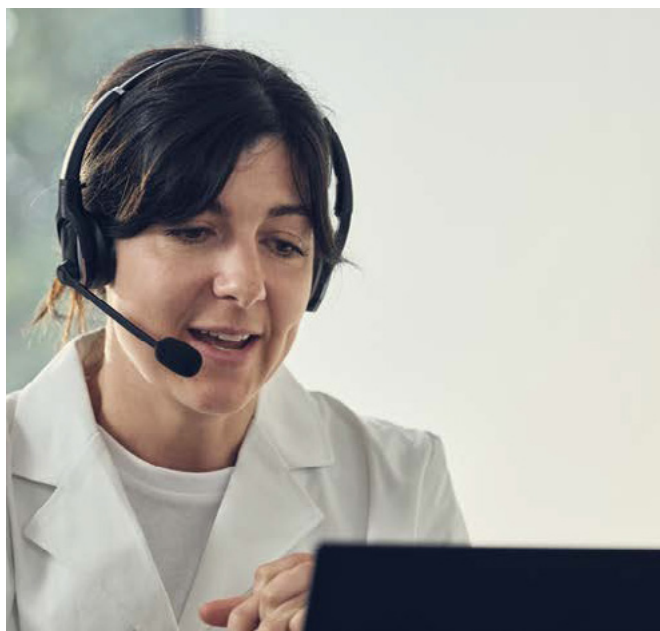

### Why EPOS for Healthcare

- Certified for Microsoft Teams
- Plug and play simplicity
- Lightweight and portable headsets that ensure all day wearing comfort
- Premium audio experience for enhanced concentration

Secured and optimized for healthcare: With noise-reduction and directional microphones, an EPOS headset secures sensitive information by keeping the conversation private and intimate

### Why Microsoft Teams for Healthcare

- Reliable performance from the global leader in UC and collaboration
- Best in KLAS awards as top video conferencing platform in helping healthcare professionals improve patient care
- Simple and secure collaboration and communication with chat, video, and voice
- Seamless virtual health experiences
- Coordinate shift management

# EPOS

EPOS' Microsoft Teams Certified devices are ideal for:

## Virtual Consultation

Our secure, compliant, and easy-to-use telehealth technology solutions make virtual care possible and protect patient privacy. Recommended products for virtual consultation: EXPAND 30T and IMPACT 600 Series.

## Patient Rounding

Critical to patient care, rounding and visits also improve levels of staff well-being and offer medical students and future clinicians a way to learn on the job. Our products allow healthcare professionals to undertake patient rounding and visits virtually, increasing productivity and efficiency. Recommended products for patient rounding: MB Pro Series and EPOS' Bluetooth® headsets.

## Administration

Our premium quality, reliable health care communication tools are engineered to keep processes running smoothly and protect patient privacy. Recommended products for administration: IMPACT 600 Series.

### IMPACT 600

- Ultra noise-cancelling microphone for clear speech in noisy environments and Active Noise Cancellation for supreme comfort
- Proximity sensor technology and in-line call control for easy call management
- EPOS ActiveGard® technology protects against acoustic injury

### IMPACT MB Pro

- EPOS Voice™ for a natural listening experience and ultra noise-cancelling microphone for optimized speech
- Up to 15 hours' talk time for all-day use
- Easy headset docking in between calls with magnetic charge interface

### EXPAND 30T

- Portable design, Bluetooth® or USB-C connections, multi-point connectivity and one touch access to Microsoft Teams
- EPOS Voice™ technology for an outstanding, natural listening experience
- Industry-leading duplex performance allows simultaneous speech
