

SAMSUNG

The laptop that goes
further, faster

Meet the high-performing Galaxy Book2 Business

Introducing the new Galaxy Book2 Business, our fastest Galaxy Book yet. Combining next-level performance with ultra-durable, ultra-light hardware, it's designed to make hybrid working easier than ever.

Featuring the new Intel® 12th processor, the Galaxy Book2 Business makes light work of running multiple apps, helping you get more done. It's also been tested to MIL-STD 810H standards for high and low temperatures, vibration and shock. So, whether you're working at home or out in the field, it won't let you down.

When it comes to video calls, we've got you covered. Clever AI tools like auto-framing, noise cancelling and background effects make sure you look and sound your best, even in busy places. When you're on the move, the Galaxy Book2 Business connects with the wider Galaxy

ecosystem to help you quickly switch between devices or share information.

On top of that, the Galaxy Book2 Business comes with best-in-class security at every level, keeping you and your data safe. Defences built below the OS combine with the Intel® vPro platform and Intel® Hardware Shield to create multi-level security, protecting your laptop's hardware and OS. Plus, Microsoft Secured-Core PC1 detects and deals with kernel and firmware attacks,

SAMSUNG

A range of features that make security easy.

Make device management simpler than ever. The Galaxy Book2 Business comes with added layers of protection built on Intel® vPro platform, giving you multi-level security that protects you from both hardware and OS-level attacks.² In addition, Microsoft Secured-Core PC protects each device from kernel and firmware attacks, meaning malicious codes can't corrupt the system and affect your data.²

² Selected models only

The most secure Galaxy Book for business yet.

Stay secure without the hassle. Using a combination of our defence-grade security features, Intel® Hardware Shield Technology and secure embedded processor, the Galaxy Book2 Business is built with a Tamper Alert function that quickly detects threats and stops attacks before your OS is infiltrated.

The Galaxy Book2 Business also uses a Hardware Root of Trust which validates your computer BIOS and builds a dependable chain between its CPU, secure embedded processor and SPI flash. This way, it can deal with threats during the device boot process and automatically restore the BIOS with a backup copy before being compromised.

Secured access.

Control who accesses your Galaxy Book2 Business with Fido 2.0 Fingerprint input and a list of authorised users who have permission to unlock. This makes it easier for you to securely share devices, helping you boost collaboration and productivity.

The Galaxy Book2 Business also features Private Share, the Blockchain-based secure file sharing platform that prevents unauthorised file saving and file capture. Private Share is the safest platform for encrypting and sharing confidential information and allows you to authorise access, set expiration dates on files and even retract viewing rights. It's a simple, easy-to-use feature that makes sure your important data stays classified.

A laptop with the speed and power to meet any challenge.

When you need to get lots done, the Galaxy Book2 Business has everything you need. Featuring the new Intel® 12th processor—our fastest in a Galaxy Book yet—it's ideal for juggling between multiple apps and tasks.

The Galaxy Book2 Business also features Wi-Fi 6E support 6GHz frequency, giving you quick access to content without buffering or lengthy download times. You can also stay connected and productive with a wide range of ports, including Micro SD, USB Type-A, 2× USB Type-C (with x1 Thunderbolt™ 4), HDMI and Ethernet (RJ45).

A new, improved and more reliable video call experience.

Enjoy a smooth, consistent video call, all while staying secure. With the Galaxy Book2 Business' 1080p webcam you'll be seen in your best light, while Dolby ATMOS Sound, on-air mic dual array and intelligent noise cancelling means any audio stays crystal clear.

Studio Mode makes sure all your meetings have a crisp, professional feel. Auto-framing keeps focus on your face while background effects remove visual distractions. And, with Galaxy Book2 Business' IR Camera—a first for a Galaxy Book—you can log in with facial detection via Windows Hello to save time.

Seamless experience across Galaxy ecosystem.

Work your way and seamlessly switch between your Galaxy devices through your Samsung Account, Bixby (voice assistant) and Private Share. Quick and Private Share syncs across Galaxy devices (phone-tablet-laptop) to provide fast and easy file sharing for your teams. Smart Organizer simplifies file management to help you easily manage file creation, use and change history as well as add tags to your files for categorisation and find what you need faster.

Tough hardware that won't let you down.

No matter where you work, you won't need to worry about hardware damage. The Galaxy Book2 Business is built to withstand even the toughest working environments. Tested to MIL-STD 810H standards for altitude, humidity, high and low temperatures, dust, vibration and shock, it's ready for work out in the field.
