Explore SCC's IBM Power digital platform

Security and scalability for your hybrid
cloud with IBM Power9 and 10

The new digital route to purchase for selected IBM Power products

Click here

What can i see/do on the platform?

- View and get prices for IBM Power9/10 bundles
- Contact your IBM business partner
- Access info re RedHat cluster management, migration services and payment options
- See leasing options

Why IBM Power Systems?

For the security, reliability, and performance necessary in an effective hybrid cloud strategy. Find a server to match your workloads, IT environment and budget.

IBM Power9/10 configurations*

Grow your business faster with Power9/10, offering more efficient scaling from core to cloud with less energy and footprint. Customisable to meet your requirements.

Configuration options are -

- Entry Server for IBM i solutions
- Entry Server for Oracle Solutions
- Application Modernization with RedHat OpenShift
- Entry Server for SAP HANA

* All configurations include IBM PowerVM Enterprise Edition V3 and 3yrs HWMA & SWMA (5dys x 9hrs)

You can also access information on the following topics -

Red Hat Advanced Cluster Management

Watch how to create and manage your multi-architecture Openshift clusters with RH Advanced Cluster Management, how applications and containers can be managed and how a multi-architecture application can be deployed and moved across clusters.
