

**Designed to power
productivity**

Designed to power productivity

Microsoft Surface Laptops have the performance to match any task and deliver a premium experience that unlocks your teams' potential. Take video calls, co-author presentations, and run analytical models simultaneously with lightning-fast performance and multitasking power. Choose from a variety of PixelSense™ touchscreen display sizes and three key form factors: The transformative Surface Laptop Studio with the ability to convert from laptop to creative canvas built for high-intensity work; or the sleek Surface Microsoft Surface Laptop 5 with incredible typing experience and power, or the lightweight portability of the streamlined Laptop Go 2 for essential work. These are the devices for your team to get more done.

Laptops designed by Microsoft

Designed by Microsoft, Surface devices are thoughtfully built, adapting in versatile ways to how teams work, learn, and create. More than a laptop, Surface unlocks the potential of people and businesses to be more innovative. Flexibility comes in a variety of form factors putting high-powered productivity at your team's fingertips – no matter where work happens. And world-class security is built in to provide peace of mind. More than a laptop, Surface unlocks the potential of people and businesses to do more.

Built for security, designed for trust

Held to the same standard as all Microsoft services and software, Microsoft Surface devices provide uncompromising chip-to-cloud security, put ultimate control in your hands, and provide peace of mind wherever and however work gets done. In a global environment where security threats are ever-increasing in sophistication, Surface provides world-class security across multiple layers including hardware, firmware, software, application, and identity. From conceptual design to a team members' first Hello – Surface reduces complexity and elevates trust.

Designed to simplify management

Do more with less—less resources, less complexity, and less associated risk. From the start, Surface devices are designed by Microsoft to give employees the versatility they need and IT pros the control and agility to keep business running efficiently. When it comes to managing those devices, a standardized Surface portfolio combined with Microsoft Endpoint Manager (MEM) enables agility in deployment and management of your investment. Improved IT efficiency, reduced overhead and support costs, and minimized downtime are all benefits seen by organizations that have adopted Surface.
