Flexibility that will reshape the workday

Flexibility that will reshape the workday

Work comes in all shapes, sizes, and places. Built for versatility and choice of performance, each Surface 2-in-1 features the iconic kickstand combined with the PixelSense™ touch display, and connects with our signature keyboard, and Surface Pen.1 Every Surface 2-in-1 is capable of seamlessly transforming from a full touchscreen laptop into a portable tablet, a digital canvas, or a docked workstation. Optional LTE2 or 5G can keep frontline, remote, and work from anywhere teams connected. And performance—from the most powerful Surface Pro 9 to the compact Surface Go 3—is customizable to your teams' needs. This is portability and connectivity, made to flex to the way your team works.

Laptops designed by Microsoft

Designed by Microsoft, Surface devices are thoughtfully built, adapting in versatile ways to how teams work, learn, and create. More than a laptop, Surface unlocks the potential of people and businesses to be more innovative. Flexibility comes in a variety of form factors putting high-powered productivity at your team's fingertips – no matter where work happens. And world-class security is built in to provide peace of mind. More than a laptop, Surface unlocks the potential of people and businesses to do more.

Built for security, designed for trust

Held to the same standard as all Microsoft services and software, Microsoft Surface devices provide uncompromising chip-to-cloud security, put ultimate control in your hands, and provide peace of mind wherever and however work gets done. In a global environment where security threats are ever-increasing in sophistication, Surface provides world-class security across multiple layers including hardware, firmware, software, application, and identity. From conceptual design to a team members' first Hello – Surface reduces complexity and elevates trust.

Designed to simplify management

Do more with less—less resources, less complexity, and less associated risk. From the start, Surface devices are designed by Microsoft to give employees the versatility they need and IT pros the control and agility to keep business running efficiently. When it comes to managing those devices, a standardized Surface portfolio combined with Microsoft Endpoint Manager (MEM) enables agility in deployment and management of your investment. Improved IT efficiency, reduced overhead and support costs, and minimized downtime are all benefits seen by organizations that have adopted Surface.

Footnotes and disclaimers:
1 Signature keyboard and Surface Pen sold separately.
2 LTE functionality available on select configurations only. Service availability and performance subject to service provider's network. Contact your service provider for details.
