# Build vs Buy

We understand that developing a security operations strategy can be overwhelming. You want to make sure your business is protected, but you also want to make an informed decision that won't break the bank.

Our team is here to help you navigate through the pros and cons of building in-house versus outsourcing.

We're dedicated to ensuring you make the best choice for your business, so you can have peace of mind and focus on what matters most.

| In-House | Outsource |
|---|---|
| High Costs & Investment | Cost Efficient & Demonstrated ROI |
| Business Hours Coverage | 24/7/365 Detection & Response |
| Navigating the Skills Gap & Rentention | Available Certified Experts |
| Delayed Time -To-Value | Rapid Time -To-Value |
| Inflexible & Expensive Scalability | Flexible & Scaled to your Needs |
| Adhere to Compliance Standards | Certified to Compliance Standards |

We're all about making every second, pound and penny count for you. That's why we want to remind you to take a moment to think about the time to realise value before you make any decisions - it's a game-changer.

In-House — Value Realised - 12 Months+

Outsource — Value Realised - 3-6 Months

Cost (y-axis) / Time (x-axis)
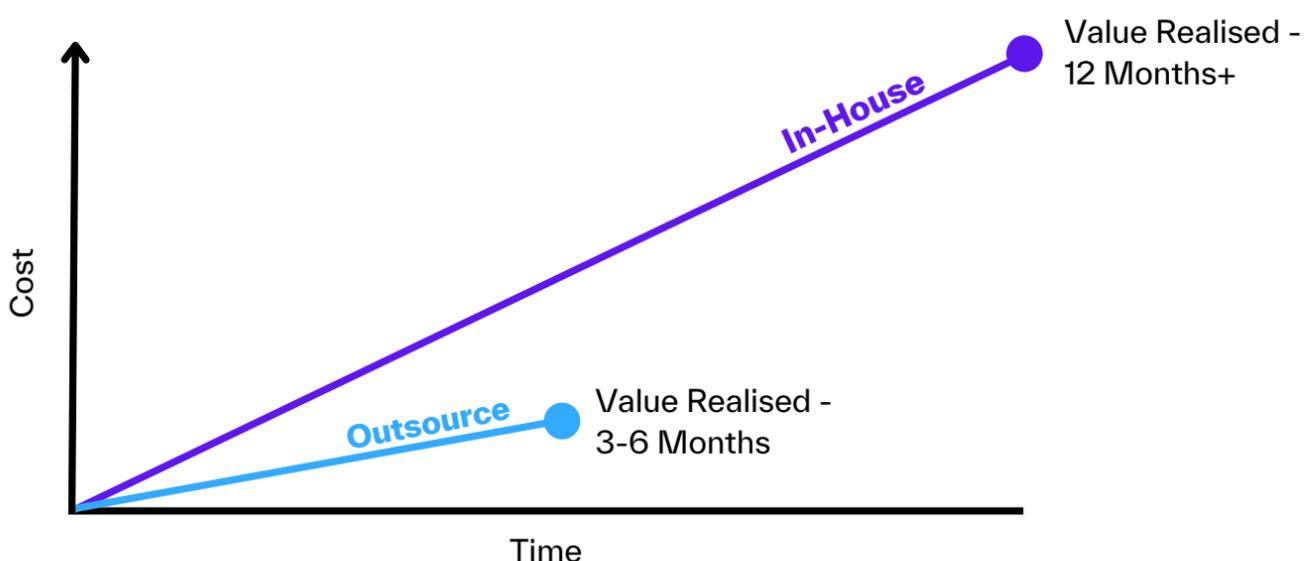

# Build vs Buy

Let's explore a few questions that are on everyone's mind.

## #1

How will you demonstrate value and ROI to your executive team and board of directors?
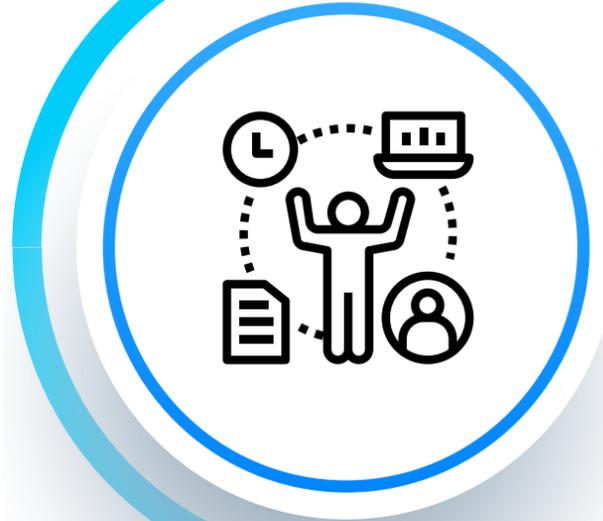

## #2

Can your team support 24/7/365 in-house SOC operations and deploy the technology required?

## #3

How will you take the lead in interpreting and delivering threat intelligence insights?
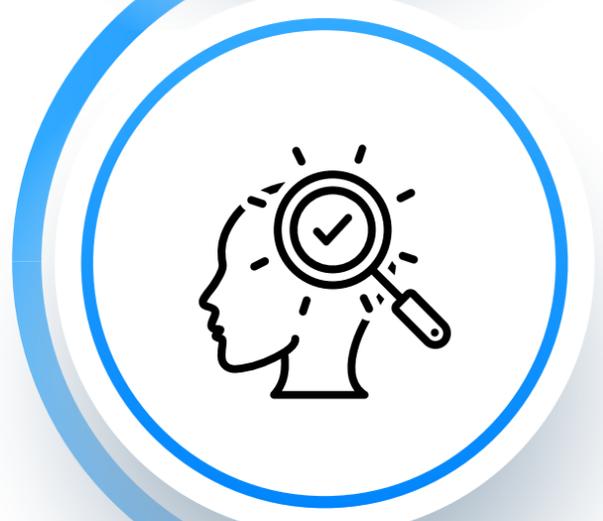

## #4

Who will design and build your SOC processes and support continuous improvement?
