

Data Security Pathfinder

Identify data security risks in your organisational data

Detecting, investigating, and acting on data security risks in your organisation is critical to ensuring trust, creating a safe workplace, and protecting company assets and employee and customer privacy.

The Data Security Pathfinder gives you the insights you need to understand data security, privacy and compliance risks in your organisation.

Intelligently investigate and take action on data security risks

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach that can help quickly identify, triage, and act on data security risks is more important than ever.

By participating in this engagement, our experts will work with you to:

- Document your objectives and strategy around data security, privacy, and compliance.
- Show how to detect, investigate and take action on data security and privacy risks.
- Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies
- Provide actionable next steps based on your needs and objectives.

Pathfinder Highlights:

Understand the risks of Dark Organisational Data

Learn about the organisational insiders risks

Assess your environment against data protection standards

Receive an analysis report of findings and associated risks

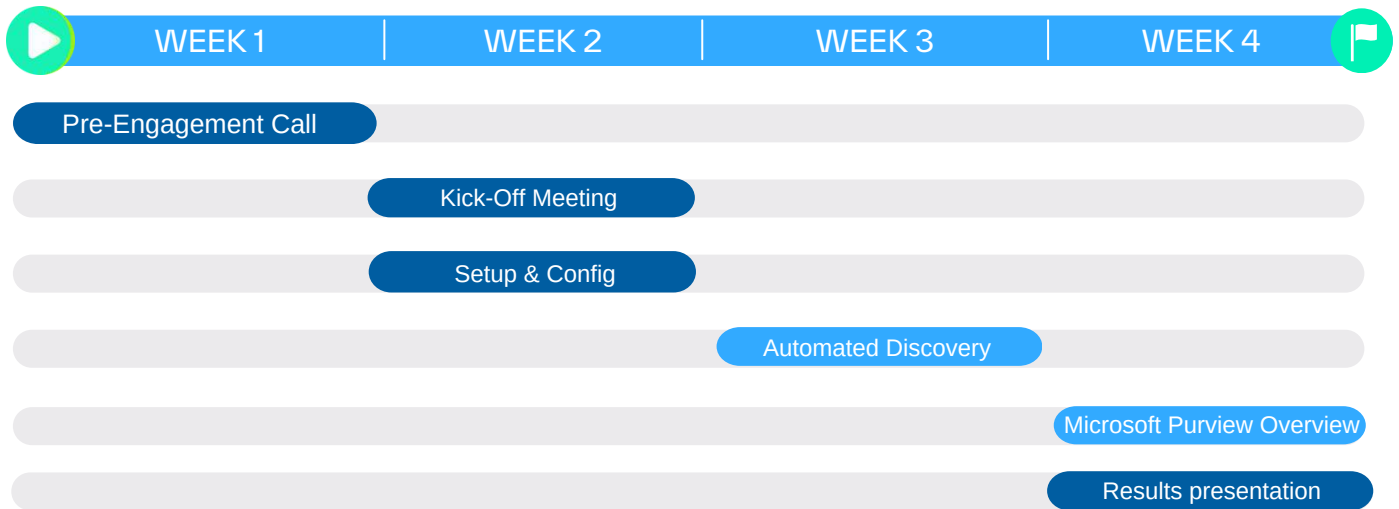

Learn about tools and services that can help mitigate risks

Data Security Pathfinder

What to expect

Over the 30 day Data Security Pathfinder, SCC require just 4 hours of your time to get set up and report back the results of the data collected. You will then take away an actionable tailored plan to improve your data security strategy.

Why SCC?

SCC are a member of Microsoft Intelligent Security Association and a Microsoft Security Solutions Partner.

We are proud to hold all four advanced specialisations in the security space strengthening confidence in our expertise and solidifying our position as a leading provider of managed security services.

SCC leverage the power of Microsoft Sentinel, Defender for Endpoint, and the Microsoft 365 Defender stack combined with our Security Operations Centre to strengthen your security posture and deliver rapid detection & response across your organisation.
