SCC Document Services and Canon:
Secure printing with uniFLOW Online

With the future workplace looking to be hybrid, protection of personal and business data has never been so important.

Sensitive data is constantly transferred in the print and scan atmosphere, so it is vital to maintain a high level of security across the whole environment to prevent any data breaches.

Simple. Serverless. Secure

As businesses shape their cloud strategy, they increasingly seek to mix and match the best available technologies to give their companies flexibility and cost advantages.

uniFLOW Online has been developed from the ground-up to leverage the benefits of Microsoft Azure cloud platform, providing superior enterprise platform security, scalability and resilience for organisations of all sizes.

Protection

Authentication | Print/ scan job security | Mobile security | Data minimization | GDPR made simple | Tenant isolation | Regional datacenters

What is uniFLOW Online?

uniFLOW Online is a secure cloud print and scan solution which enables organisations to manage their entire print environment. The solution aims to upgrade document security, control costs and increase employee productivity while simultaneously reducing internal IT requirements. Furthermore, uniFLOW Online can also:

- Manage every stage of your document lifecylce across your hardware and software devices.
- Meet your evolving print and scan management requirements via cloud-based subscriptions modules.
- Increase device security by controlling access to devices and setting user authentication options.

Key Feature of uniFLOW Online

With uniFLOW Online, users can print and scan confidential documents securely via:

- **Flexible authentication:** Different authentication methods include company proximity card, a mobile phone, a PIN code, or a combination of PIN code and company proximity card.

Key Advantage

uniFLOW Online secures your printers against unauthorised users and usage across multiple locations. It combines enhanced security and user convenience with simple authentication methods, such as using company proximity card, mobile phone, or a PIN code.

Answering Today's Business Needs

✓ **Print documents from cloud storage services:** uniFLOW Online enables users to print their cloud stored documents directly from connected devices (e.g. Dropbox, Evernote, Microsoft Sharepoint, etc.)

✓ **Send print jobs from anywhere:** Regardless of location, users can use their smartphones or tablets to print documents securely.

✓ **Immediate benefits:** uniFLOW Online is built on cutting-edge cloud technology (Microsoft Azure) that brings superior enterprise platform security, scalability, and resilience.

Why SCC Document Services and Canon?

SCC Document Services and Canon have been working in partnership for over a decade.

We have extensive experience in delivering document print, security, and automation for a multitude of organisations. Through this partnership, we hold a strong and deep-rooted relationship within Canon enabling us to sell and support Canon's entire catalogue of products and services.

Our partnership ensures that we can give our customers choice, flexibility and support throughout the document lifecycle of their Canon solutions.
