Samsung Computing for business

Computing for business

As the way we work evolves, those harnessing the power of AI will lead the way.

In a world of remote working and flexible hours, versatility is key for both workers and the technology they rely on. At the same time, AI is becoming more prevalent in the workplace, allowing businesses to boost productivity to levels never before seen.

To remain competitive in these fast-changing times, businesses of all kinds need truly intelligent technology. It's predicted that AI-powered devices will be in mainstream use across industries by 2025, with 60% of businesses investing by 2027¹. AI laptops will free up employees for more important and fulfilling work, helping businesses maintain both a commercial edge and tight security.

It's an exciting time for businesses to embrace this new generation of AI-powered laptops designed to help them work smarter, not harder.

Computing challenge

The pursuit of productivity is putting additional strain on workers and companies to perform.

Mobile devices have started to adapt to more automated ways of working, but professional laptops have lagged behind.

That means day-to-day business tasks haven't been optimised as much as they could be. As a result, people are working much harder than they have to. In fact, 64% of employees say they lack time and energy to do their job. It's not surprise then that 70% of employees would use AI to lighten their workload¹.

Computing opportunity

Staying ahead of the curve means working smarter, not harder, with AI-powered business laptops.

Meet the world's first true generation of AI-powered laptops. They're designed to take the pressure off workers and businesses, helping them perform at their peak.

With AI encased in beautifully designed, light yet durable hardware, these laptops form part of a seamlessly connected Samsung ecosystem.

With the power of AI, users can work anywhere, uninterrupted delivering true business mobility. And they can work anywhere with confidence, thanks to military-grade Samsung Knox security².

Productivity at an unbeatable price

Welcome to a new era of smarter laptops

The latest generation of business laptops from Samsung mark a new era of mobile productivity. They're designed to help you work smarter, not harder.

Combining the unrivalled performance of next-generation® Intel Core™ Ultra processors and the intelligence of neural processing units (NPU), the Galaxy Book4 Series is set to change how we see our laptops.

Samsung's partnership with Microsoft gives you a new intelligent assistant — Copilot— to help you shortcut daily tasks and boost your machine's capabilities. With AI freeing up mental space for more important tasks and security matching your fluid ways of working, your Samsung Galaxy Book4 laptop will help you stay ahead of the curve—and any cyber threats.

With astounding touchscreen display options¹, your work will look its best, inside or outside the office, while also being easier to edit, annotate and share.

If that's not enough, the entire range seamlessly integrates with the rest of the Galaxy ecosystem. This allows you to transform your workspace, transfer and share content seamlessly, use your phone as a webcam², or turn your tablet into a Second screen³.

Now that's a true work of smart.

1. Available on Galaxy Book4 Pro and Ultra series.

2. Galaxy smartphone with One UI 1.0 or above required. Requires the same Microsoft account. Feature available March '24

3. Available on selected Galaxy Tablet models only, including Galaxy Tab S7 series, Tab S8 series and Tab S9 series and Tab Active4 Pro.

AI powered productivity

Put your new AI assistant to work

AI-powered business laptops help you complete your tasks quickly and simply.

Ready for a new way of working? The Galaxy Book4 Series laptop is truly intelligent—powered by the latest Intel® Core™ Ultra processors, as well as an in-built AI engine, for superior performance¹.

The revolutionary Intel® NPU is a specialised microprocessor designed to accelerate machine learning and AI tasks. That means richer collaboration, faster multi-tasking and better battery management. It also unlocks features like Rewind, AI-powered transcription, photo and video editing and advanced Studio Effects to help you look your best on video calls.

The Galaxy Book4 Series also features Microsoft's AI companion—Copilot.

Copilot will help you complete your day-to-day tasks with ease, taking some of that workday strain off your shoulders. It'll give you answers and inspiration from across the web, support your creativity and collaboration, and help you focus on the task at hand. It launches with a keystroke, so whenever you need an answer fast, or want to generate content from your ideas instantly, just tap that key and ask Copilot.

Your new AI companion is also secured for your eyes only, keeping your work in all your Microsoft 365 apps—including your emails, meetings, chats and documents—organised, summarised and secure².

1. Available on Galaxy Book4 Pro and Ultra series.

2. Microsoft Copilot for Microsoft 365 subscription required.

Confidence for a new working world

Your data is locked tightly, no matter where your ultra-portable laptop brings you

Go anywhere with your Galaxy Book4 Series laptop and know that you're ready for whatever the world can throw at you.

Supremely portable, this is a laptop series designed to flex indoors, outdoors or on the move. Each device is thin and light for easy portability. And thanks to responsive, anti-reflective touchscreens, you can work the way you want. The Galaxy Book4 360 and Pro 360 give you the ability to transform your device from a laptop into a tablet. You could go from writing a report to presenting it to marking up edits in an instant.

Every member of the Galaxy Book4 Series features a super-long-lasting battery¹, as well as a universal charger for a rapid battery refresh almost anywhere. No more running out of charge on those long commutes. You can also be confident that, when you're working outside the office, your data is protected by three layers of unrivalled protection. Microsoft Secured Core protects your OS and applications, while Samsung Knox and Intel® security defend your hardware. AI-enhanced Microsoft Defender also blocks ransomware and detects attempts at cryptojacking. That's true security for our changing world of work².

 Microsoft

1. Typical value tested under third party laboratory condition. Rated minimum capacity of the Galaxy Book4 Ultra, Galaxy Book4 Pro 360, Galaxy Book4 Pro 16" is 76Wh (Typical), Galaxy Book4 Pro 14" is 63Wh (Typical), Galaxy Book4 360 is 68Wh (Typical) and Galaxy Book4 is 54Wh (Typical). Based on average use. Actual battery life varies by network environment, apps and functionality used, and other factors.

2. Available on Galaxy Book4 Pro and Ultra series.

Work smarter together with the whole Galaxy

Multi-task with ease no matter your location, or your Galaxy device.

Combine your Galaxy devices for even greater productivity and creativity.

You can turn your Galaxy smartphone camera into an external webcam for outstanding video quality on your calls. It'll also automatically frame you and add a truly professional-grade blur to the background. Compatible with all leading video call apps, you can easily and instantly change from front and rear cameras for simple sharing¹.

Your Galaxy tablet can also become a handy expansion to your Galaxy Book4, acting as a seamless secondary display which you can control with one keyboard, mouse or trackpad². You can explore files from your phone or tablet directly on your laptop and drag and drop them across devices for easy transfer with Quick Share³. Whether you need to gain more control over your presentation, speed up workflows, or grab that screenshot from a recent workshop, you just need to browse, drag and drop.

With this ecosystem, you can host a video call looking your best, use Multi control to make notes on your tablet, then easily drag them across devices for instant collaboration⁴. Now that's a smart way of working.

1. Galaxy smartphone with One UI 1.0 or above required and must be logged into the same Microsoft account.

2. Compatible with Galaxy Tab S7 series, Tab S8 series, Tab S9 series and Tab Active4 Pro.

3. Galaxy smartphone or tablet with One UI 2.1 or above required.

4. Galaxy smartphone or tablet with One UI 5.1.1 or above required and must be logged into the same Samsung account.

Expert human support for your AI-powered device

Dedicated UK-based technical support is here for your peace of mind.

Put your tech worries to rest. Samsung's dedicated team of expert support engineers are here to help you resolve any issue. Even if it's an issue with a partner app or system, we'll work our magic to ensure you can get back to work fast.

You can get in touch with our engineers throughout the working week for a rapid case response or turn to our 24/7 online self-help service for anytime resolution.

If your operations are a bit more specialised, you might want to opt for enhanced support. This offers you multiple repair and replacement options, with an on-site engineer for repair/exchange wherever is most convenient for you. We can also easily transplant your original drive into a replacement device, so you never lose your data. Or you can ask for a military-grade data wipe to ensure sensitive data never leaves your hands.

The right tools for the job

Take your productivity even higher with perfect-fit accessories for the range.

Take control of your workflow with accessories that work around you and your device ecosystem¹. Samsung offers a range of business-focused computing accessories that perfectly complement your new Galaxy Book4 Series device. They'll help you complete your daily tasks in total comfort and confidence.

We've worked closely with partners like Targus to bring you a wide range of accessories, which can be purchased solo or in smart, money-saving device bundles. From multiport and travel adapters that help you quickly connect to other work tools, to privacy screens that keep your work away from prying eyes, you're sure to find your device's ideal companion. They're designed to help you work even smarter.

Galaxy Book4 Ultra

Galaxy Book4 Ultra

Ultimate performance

Take on the most intense tasks without intense effort. AI will help you make the most of the powerful, portable performance of the Galaxy Book4 Ultra. Now you can create, design, develop and discover faster than ever before. This is the laptop for those who demand unrivalled productivity.

A dedicated NVIDIA® GeForce RTX™ 40 series GPU helps you create your best work ever, all on familiar Microsoft 365 apps¹. And with graphic rendering power that you'd expect from a fully loaded tower PC and a Dynamic AMOLED 2X touchscreen, the work you create will look truly astounding. When you get a break from the workday, you can dive into immersive games and entertainment.

1. Microsoft 365 [subscription](#) required.

Record, create and edit like a pro

Feel like a filmmaker from the comfort of, well, anywhere.

Create the best content of your life, almost effortlessly. With the power of the dedicated NVIDIA® GeForce RTX™ 40 series GPU, you can edit like a true professional, transferring and transforming footage shot on your Galaxy smartphone to the big screen. Whether you're filming team bios or recording webinars, your video content is sure to stun people with its quality. And you'll be amazed at how quick it is to render impressive 3D graphics, lighting and even the most resource-intensive visuals.

Samsung Studio provides you with features like non-destructive editing, an optimised video timeline and multi-layered editing, it's never been easier to make professional-grade video. In a world in which video content dominates, Samsung Studio gives you and your creative teams the power to compete.

Intelligent assistance at the ready

An AI assistant to help you navigate every aspect of your working day.

Boost your productivity without working longer hours. That's the promise of Microsoft's AI assistant, Copilot.

At the tap of a button, you can call up Copilot to complete a wide variety of tasks across the Microsoft 365 suite—whether that's writing a formal email, identifying patterns in big spreadsheets of data, or drafting a presentation in a matter of minutes¹.

1. Microsoft Copilot for Microsoft 365 subscription required.

Dive into your work

Display quality so real you'll want to touch it—and now you can.

Get up close and personal with your work and create at the touch of your fingertip. The Galaxy Book4 Ultra allows creatives to generate ideas and results faster, gives analysts clearer insight quicker and makes admin a breeze.

The Galaxy Book4 Ultra's 16" Dynamic AMOLED 2X display is a touchscreen. So, you can drag and drop files, copy, paste and navigate intuitively, just like you would on your phone. And because it's anti-reflective, you can take your work anywhere, even into the bright sunlight. Comfortable viewing doesn't just happen at a desk anymore.

Powered by the Intel® Core™ Ultra 7 processor, you'll enjoy pin-sharp 3K resolution and 120% DCI-PCI colour volume. The Galaxy Book4 Ultra produces vibrant hues and crystal-clear images that creatives, engineers and power users alike will be amazed by. And when you do end up spending long hours staring at this beautiful screen, you won't leave with sore eyes—thanks to the eye-care technology.

Perform at your peak, anywhere

Get the power of a workstation in one portable, hardwearing package.

Achieve more, faster than ever, with a laptop packed to the brim with processing power. The Intel® Core™ Ultra 7 processor inside, combined with the AI-enabling NPU, drives next generation apps with ease. So, whether you're editing raw footage, creating large presentations, or running machine learning applications, you can be confident that your laptop can handle it.

The Galaxy Book4 Ultra is as impressive outside as it is inside. With sleek lines, a strong aluminium chassis and a luxurious Moonstone Grey finish, it doesn't just run like a dream—it looks like one, too. You'll be the envy of the office. Or the coffee shop. Or anywhere you're working.

A fortress of protection for your data

Get ahead of evolving cyberthreats with smart laptop security.

Stay productive and confident in the connected world thanks to intelligent laptop security. You get extra peace of mind when working on your Galaxy Book4 Ultra, thanks to three layers of next-generation security. As Microsoft Secured Core is protecting your operating system and apps, Intel chip security will be defending the integrity of your hardware. Samsung Knox also gives you another layer of super-tough security, so you can say 'goodbye' to cyberthreats and 'hello' to certainty in your security.

Keep up the energy

Battery optimisation that takes you further through your workweek¹.

Running powerful apps draining your battery? With the Galaxy Book4 Ultra, you can work confidently throughout the workday. Smart, NPU-enabled AI performance means that your laptop will consume battery in a much more efficient manner—and keep your device cooler. So, now you can work through those long days, without having to keep an eye on the battery level. If you do start running low, you can get back in the game fast thanks to the 140W USB-C charger.

¹. Typical value tested under third party laboratory condition. Rated minimum capacity of the Galaxy Book4 Ultra is 76Wh (Typical), Based on average use. Actual battery life varies by network environment, apps and functionality used, and other factors.

Galaxy Book4 Ultra

Connect to a Galaxy of possibilities

Browse, create and share content and files safely in the blink of an eye.

Work smarter by using all your Galaxy devices together. Just by scanning a QR code with your phone's camera, you can easily pair it with your Galaxy Book4 Ultra and use all your favourite mobile apps on a bigger screen¹. And if you need to transfer a photo, a video or even just some plain text, you can open File Explorer² to drag and drop files across devices as if they were one seamless package. Everything from creative workflows to data analysis can be made smooth, simple and more effective.

Then once you've done your bit for the project, you can share files with your team in an instant with Quick Share³. If the work is really sensitive, you can also opt for Private Share, which utilises block-chain based file-sharing technology to protect your work in transit. It's never been safer to send data across Galaxy devices.

1. Galaxy smartphone with One UI 1.0 or above required and must be logged into the same Microsoft account. 2. Feature available from March 2024. 3. Galaxy smartphone or tablet with One UI 2.1 or above required.

Look your best in video calls

Turn your Galaxy smartphone into a webcam for ultimate video call quality.

Take advantage of the incredible clarity of your Galaxy smartphone's camera system to take your video calls to the next level. Just connect your smartphone to your Galaxy Book4 Ultra and you can use any of the finely tuned cameras as your webcam¹. You can also use your phone's classic filters to change your look, take advantage of auto-framing to ensure you're always centred and blur background distractions automatically.

And when you want to show off the results of your work or give your remote team a tour of your surroundings, you can just switch between front and rear cameras. How's that for an instant change of perspective?

See more, do more

Expand your Ultra power across more devices to build one powerful workstation.

Organise your screens to make complex workflows a breeze. Whether you're editing video, designing content, or just typing notes on a call, you can create more workspace instantly by turning your Galaxy tablet into a Second screen¹. The Galaxy Book4 Ultra gives you unlimited flexibility to navigate between laptop and tablet using just one taskbar. And with multi control, you can even use your laptop's keyboard and trackpad to work across your Galaxy Tab and Galaxy smartphone, as if it were one seamless device².

1. Galaxy smartphone with One UI 1.0 or above required and must be logged into the same Microsoft account. Feature available from March 2024. 2. Compatible with Galaxy Tab S7 series, Tab S8 series, Tab S9 series and Tab Active4 Pro. 3. Galaxy smartphone or tablet with One UI 5.1.1 or above required and must be logged into the same Samsung account

Business Use Case

Large Enterprise top audience needs:
performance, security, services, AI capabilities

Power for data processing and creativity

The Galaxy Book4 Ultra will be popular across all your teams, no matter if they're creatives or data analysts. With the latest Intel® Core™ Ultra processors and NVIDIA® RTX GPU, it offers all workers superior multi-tasking and graphic performance. The device can run even the most demanding software. Creative teams, in particular, will find they can work at a far faster pace. They'll also find it simpler to transfer, edit and export high-quality content.

Making busy meetings more personal with AI

In a busy hybrid meeting, it can be easy for individuals and their ideas to get lost in the crowd. Thankfully, Microsoft Copilot can make helpful, detailed meeting notes, summarise them for later reference and even generate presentations based on the discussed information near instantly. That means everyone on the call can have their say, keep up with the conversation and spread their ideas widely¹.

Three layers of security against attack

Any attempt at tampering or infiltrating the Galaxy Book4 Ultra will likely be a frustrating one for any would-be cybercriminal. With three layers of security, designed to keep everything from the hardware to individual data secure, large enterprises can be confident they're protected. And if anything disastrous does happen to the device, the BIOS can be recovered, making it much easier for IT teams to get the laptop back in action.

Galaxy Book4 Pro 360

Galaxy Book4 Pro 360

Switch things up for maximum productivity.

Impress customers and colleagues with a premium, responsive 2-in-1 device designed for unrivalled agility.

You'll be able to take on any workday challenge by switching from laptop to tablet mode instantly. At one moment, you could be using the responsive S Pen to take notes, draw and edit documents directly, the next you could be powering through huge spreadsheets in laptop mode. And you can swap and change as often as needed, throughout the longest of workdays, thanks to a long-lasting battery.

No matter what position the screen is in, you'll be stunned by the immersive, 16" dynamic AMOLED 2X touchscreen. The 2-in-1 has never looked better.

Elevate your presence

Master video calls with advanced studio effects that really leave an impression.

Look and feel like a real pro in all your video calls, thanks to Windows Studio Effects powered by the Galaxy Book4 Pro 360's built-in NPU. Whether you're having a quick catch up, or a long sit-down meeting, you can be sure you'll always look and sound your best.

Studio Effects helps create true-to-life video call experiences and gives you the option to apply extra effects. That means you can blur your surroundings, eliminate background noises, auto-frame your face and apply flashier effects effortlessly. Better yet, you don't need to worry about maintaining eye contact. AI can ensure you always look attentive, even if you're looking away to check notes or answer an urgent message.

Genius at your fingertips

Your professional 2-in-1 is hiding an extra feature: an in-built AI assistant.

Get a second professional opinion from your personal AI assistant, whenever you need it. Want a few ideas for that image you're working on in tablet mode? Or a list of summarised insight for that report you're typing up? Copilot can complete a wide variety of tasks across the Microsoft 365 suite, no matter if you're using your Galaxy Book4 Pro 360 as a laptop or tablet¹. This cloud-based assistant can generate limitless creative options and ideas in seconds, helping you stay ahead of the curve

1. Microsoft Copilot for Microsoft 365 subscription required.

The 2-in-1 never looked so good

Get the best viewing experience possible, anyway you flip it.

Immerse yourself in exceptional picture quality, whether in tablet or laptop mode. The Galaxy Book4 Pro 360 sets a new standard for 2-in-1 displays, boasting an anti-reflective, 16" Dynamic AMOLED 2X touchscreen. Combine this with the next generation of Intel® Core™ Ultra processors and you've got incredibly rich colours and crystal-clear detail in all your work applications. Not only does it look amazing, you can also drag and drop files, copy, paste and navigate intuitively, just like you would on any other tablet. And thanks to the anti-reflective screen, you can do all this even in direct sunlight.

It can be hard to tear your eyes away from picture this good. That's why the Galaxy Book4 Pro 360 also features eye-care technology, for those long hours of intense focus.

16" Dynamic
AMOLED 2X

Touchscreen

Premium portability for the pros

See what this sleek, sophisticated 2-in-1 can really do for your fluid working.

Be the envy of the professional world with a 2-in-1 device designed to be as stunning as it is versatile. Your Galaxy Book4 Pro 360 features a seamless, fluid 360-degree hinge, allowing you to use your device as either a laptop or a tablet. You could start your day in the office, writing up reports or entering data, then take it out into the field to make handwritten notes and sketches using the super-responsive S Pen.

And no matter where you take it, you're sure to impress, thanks to sleek lines, a strong aluminium chassis and a luxurious Moonstone Grey finish.

2-in-1 design

Thin and light

A flexible fortress

Security that flexes along with your device, whatever you're using it for.

Your ideas, data and contacts are in safe hands. Wherever you go with your Galaxy Book4 Pro 360, you go with peace of mind—because you're protected by multiple layers of reliable security. As Microsoft Secured Core is shielding your operating system and apps, Intel® chip security will be defending the integrity of your hardware. Military-grade Samsung Knox adds an extra layer of reliable security. Say goodbye to malicious threats and hello to a flexible fortress of security.

Take charge, on just one charge

Conquer the workday, without worrying about running out of battery¹.

Sketch, edit, write and create throughout even the longest workday, without fearing the dreaded low-battery warning. The NPU-enabled AI in your Galaxy Book4 Pro 360 is smart about battery, helping you manage your consumption for peak efficiency. That'll keep you going for far longer—and keep your device cooler. That's plenty of time to take care of work and even some to enjoy your fav entertainment on the train home.

¹. Typical value tested under third party laboratory condition. Rated minimum capacity of the Galaxy Book4 Pro 360 is 76Wh (Typical). Based on average use. Actual battery life varies by network environment, apps and functionality used, and other factors.

Business Use Case

Creative Business top audience needs:
price, AI capabilities, performance, security

Devices that work around different workflows

There's a lot to keep track of in a busy office, especially when dealing with clients and customers. Thankfully, with Samsung ecosystem connectivity, teams can manage all their day-to-day tasks and communications from a single device. They can check missed calls, return messages and more, from their compatible Galaxy smartphone or tablet. Microsoft Copilot AI can even help compose messages for enhanced customer messaging¹.

Flexibility for work, play and display

Workers in creative or technical fields can really benefit from the incredible adaptability of the Galaxy Book4 Pro 360. With this premium 2-in-1 device, they can work from anywhere, in multiple different ways. For example, they could power through a customer presentation in the office, then take it on the road as an impressive portable display for the next big client pitch. Thanks to its long-lasting battery and fast charging, via the universal Galaxy Book USB-C charger, users can stay flexible, wherever they go.

Protect the big ideas

No one wants their creative ideas stolen, especially not confidential, business-impacting ones. But, with Samsung devices, teams don't have to worry about unauthorized eyes taking a peek. The Galaxy Book4 Pro 360 is secure out of the box and is incredibly easy to configure. Thanks to Samsung Knox, SMEs can rest assured their designs, files, client lists and more are protected.

Galaxy Book4 Pro

Galaxy Book4 Pro

Heavyweight performance in a lightweight package.

Maximise your productivity with the laptop built for professionals. The Galaxy Book4 Pro offers incredibly strong performance for all your day-to-day tasks, while still being easily portable. Whether you're powering through your work at the office, at home or on the train, the Galaxy Book4 Pro keeps you at your peak efficiency for longer.

The Galaxy Book4 Pro is luxuriously thin and light, ideal for quickly slipping in and out of your bag. But it doesn't sacrifice usability to save space, boasting a 16" or 14" anti-reflective touchscreen display that ensures clarity throughout the workday.

Get ready for your close up

Use the power of AI to sharpen up your appearance in video calls.

Make a great impression on your video calls by letting AI handle the special effects. Windows Studio Effects, enabled by the Galaxy Book4 Pro's NPU, is designed to make the most out of your laptop webcam. It creates true-to-life video call experiences and gives you the option to customise how the world sees you.

Not only can you seamlessly blur background objects, you can even trust the camera to automatically frame you as you move around. And if you have to look away from the screen, maybe to take notes or respond to a message, smart eye contact ensures you always look attentive. Smart voice focus also ensures background noises are eliminated, so your voice comes through loud and clear.

Assistance at the ready

Do more, faster, with the help of an AI assistant—ready at the click of a button.

You can achieve more in your workday by calling on Microsoft's AI assistant—Copilot¹. You can call up Copilot at the click of a button to achieve a wide variety of Microsoft 365 tasks. Whether you're drafting a vital email, trying to find patterns in a spreadsheet, or looking for answers in a long report, Copilot can help. This cloud-based assistant can generate limitless creative options and ideas in seconds, helping you stay ahead of the curve.

1. Microsoft Copilot for Microsoft 365 subscription required.

Get the power to keep on going

A laptop that is smarter about its battery usage—so you can stay on the go for longer¹.

Now you can spend the whole workday jumping between meetings and work, without worrying about your battery. The Galaxy Book4 Pro's smart, NPU-enabled AI ensures that your remaining charge is spent as efficiently as possible. You can work through those long days, without having to keep an eye on the battery level. If you do start running low, you can get back in the game fast thanks to the compact 65W USB C charger.

Layers of data-saving security

Beat cybercriminals and keep your business on track with multiple layers of security.

You can work confidently in our high-speed, connected world thanks to the layers of solid security built into your Galaxy Book4 Pro.

Microsoft Secured Core protects your operating system and apps. Intel® chip security protects the integrity of your hardware. Military-grade Samsung Knox adds an extra layer of reliable security. Say goodbye to malicious threats and hello to a fortress of security.

But such security doesn't come at the cost of mobility—in fact, it enhances it. You can access all the tools you need to complete your work, from anywhere, safe in the knowledge that cybercriminals will have a very hard time getting in the way.

¹ Typical value tested under third party laboratory condition. Rated minimum capacity of the Galaxy Book4 Pro 16" is 76Wh (Typical), Galaxy Book4 Pro 14" is 63Wh (Typical). Based on average use. Actual battery life varies by network environment, apps and functionality used, and other factors.

Sleek, slim and super powerful

Bring the power of a workstation with you anywhere, packed into a sleek laptop.

Go anywhere work takes you and know you've got the computing power in your bag to run even the most intense apps.

The Galaxy Book4 Pro's Intel® Core™ Ultra 7/5 processor and AI-enabling NPU, drives next generation apps with ease. So, whether you're creating large presentations, running machine learning applications, or even watching your favourite movies on the train home, you'll enjoy a smooth experience.

You'll be the envy of your colleagues and clients as well. The Galaxy Book4 Pro is as stunning as it is practical—thin and light, and built to feel totally luxurious.

See clearly, respond quickly

Get up close and personal with your work, thanks to a brilliant touchscreen.

Getting down to business no longer means being limited to a keyboard and mouse. The Galaxy Book4 Pro's 14" to 16" Dynamic AMOLED 2X display is a super-responsive touchscreen, so not only does it look amazing, you can drag and drop files, copy and paste and navigate with your fingertips. Now you can pinch to zoom, tap to select and swipe just like you do on your tablet or smartphone.

With the power of the new Intel® Core™ Ultra 7/5 processor, you'll enjoy a razor-sharp image and seamless touchscreen performance. And you'll get that same premium experience anywhere you go—even under bright lights—thanks to the anti-reflective coating.

Business Use Case

Government top audience needs:
security, price, performance, AI capabilities

Keep information secure

Security is of vital importance to any government body. IT teams in these organisations can safely suggest the Galaxy Book4 Pro, knowing that they're fortresses of multi-layered protection. From the chip-up, the Book4 Pro is protected from physical tampering and from external cyberthreats. No matter where work is taking place, governments can be sure that sensitive data is being stored and transferred securely.

Expand the workspace with the Galaxy ecosystem

Tackling huge spreadsheets? Monitoring multiple streams of information? Making notes during a call? Whenever government workers need a bit more working space, they can expand their workstation around their Book4 Pro by setting up their Galaxy tablet as a secondary screen¹.

And with Multi Control, users can easily drag and drop files across devices, or control apps on their phone or tablet via their mouse and keyboard².

Easing the admin load through AI

Government workers can get an instant boost to their productivity by calling on AI. At just the tap of a button, they can prompt Microsoft Copilot to shortcut repetitive tasks, summarise documents and even craft communications. Plus, since Microsoft doesn't save any information submitted off site, teams using it can stay secure and be confident their privacy is protected³.

1. Compatible with Galaxy Tab S7 series, Tab S8 series, Tab S9 series and Tab Active4 Pro.

2. Galaxy smartphone or tablet with One UI 5.1.1 or above required and must be logged into the same Samsung account.

3. Microsoft Copilot for Microsoft 365 subscription required.

Galaxy Book4 360

Galaxy Book4 360

Built flexible for the fluid worker

Flex your creativity at work with a device that transforms to help you take on any task in your workday. The Galaxy Book4 360 can turn from a laptop to a tablet in seconds, thanks to its rotating hinge. This is a device purpose-built for the hybrid worker, giving you the agility and responsiveness to adapt to changing situations.

Better yet, the Galaxy Book4 360 doesn't sacrifice performance for flexibility. It boasts a 15.6" Super AMOLED touchscreen for immersive viewing. You can also use the responsive S Pen to take notes and tap away at the touchscreen in tablet mode and do it all for longer thanks to a long-lasting battery.

Transform your view of work

Immerse yourself in a stunning touchscreen that adapts to your work needs on the fly.

Whether you're reading reports or sketching out your big ideas, the Galaxy Book4 360's 15.6" hinged display is a marvel.

Not only does it produce an amazing picture, you'll be able to transform it from laptop mode to tablet mode in an instant. You can go from tapping away on a report to pinching, zooming and swiping through imagery or video—just like that. With the power of the next-generation Intel® Core™ processor, you'll enjoy incredible clarity in either mode. And thanks to the Super AMOLED screen, you'll experience vivid colours, deeper blacks, bright whites—ideal for both work and entertainment.

Simplify your workday

There's no task too big for your AI assistant—and it's just one click away.

Get a helping hand for whatever you're working on. Want a few ideas for that image you're working on in tablet mode? Or a list of summarised insight for that report you're typing up? Just call up Microsoft Copilot—your new AI assistant. With one tap, you can call up Copilot to complete a wide variety of tasks across the Microsoft 365 suite—whether that's writing a formal email, identifying patterns in big spreadsheets of data, or drafting a presentation in a matter of minutes¹.

1. Microsoft Copilot for Microsoft 365 subscription required.

Sharpen your working style

Create amazing work fast, then show it off in high-definition video calls.

Master multi-tasking with a device designed specifically for it. The Galaxy Book4 360 is the ideal do-it-all 2-in-1 for everyday users. With the latest Intel® Core™ processors, the laptop ensures your workday is fuss-free. Whether you're drawing up notes with your S Pen or writing up a report, you can seamlessly switch between tasks whenever you need to. And when it's time to update the team on your progress, you can jump on a video call and keep working in the background, thanks to smart webcam auto-framing. The Galaxy Book4 360 is proof that flexibility is for every worker.

Galaxy Book4 360

The best of every world

Transform your device on the fly to keep up with your demanding schedule.

Take on every opportunity and come out on top, with a 2-in-1 device designed to work around you. Your Galaxy Book4 360 features a seamless, fluid 360-degree hinge, allowing you to use your device as either a laptop or a tablet. You could start your day in the office, writing up reports or entering data, then take it out into the field to make handwritten notes and sketches. That's unbeatable flexibility for those who demand more out of their workday.

And no matter where you take it, you're sure to impress. With sleek lines, a strong aluminium chassis and a luxurious finish, this is a device that's bound to turn heads

Power to match your creativity

Stay flexible by leaving the charger at home.

Power through your creative workflows, in tablet or laptop mode, without having to worry about charging. Thanks to its long-lasting battery, you can work straight through office hours and beyond. That's plenty of time to take care of work and even some to enjoy your fav entertainment on the train home.

1. Typical value tested under third party laboratory condition. Rated minimum capacity of the Galaxy Book4 360 is 68Wh (Typical). Based on average use. Actual battery life varies by network environment, apps and functionality used, and other factors.

Business Use Case

SME Business top audience needs:
price, AI capabilities, performance, security

Stay flexible on the go, for longer

Workers can take control of any workday challenge using the incredible adaptability of the Galaxy Book4 360. With this super light 2-in-1 device, users can work from anywhere, in multiple different ways. For example, it could be used as a mobile reception desk for customers to sign-in or fill out satisfaction surveys. Alternatively, it can be used as a laptop in the office to complete stock checking and ordering. Thanks to its long-lasting battery and fast charging, via the universal USB-C charger, it'll power through the workday and countless transformations.

Secure and analyse

Small businesses are a major target of cyberthreats, as they often don't have a dedicated IT team to detect and deflect attacks. But, with Samsung devices, they can work with much more peace of mind. The Galaxy Book4 360 is secure out of the box and is incredibly easy to configure. That's peace of mind for all sizes of team.

Take work across devices

Workers and IT teams can manage devices easily, all from a single pane of glass. Galaxy ecosystem connectivity allows SMEs to check missed calls, return them, access contacts and send messages from whatever device they're using in the moment. Microsoft Copilot AI can even help compose messages for enhanced customer messaging¹.

Continuity for those busy days

Thanks to the Book4 360's touchscreen, SMEs can draw, annotate and edit straight onto documents and presentations. Then, if they have to leave the office, they can continue working on the same file on their phone. Task continuity, powered by AI, ensures they'll never forget where they left off, either. Just give Copilot a quick prompt for a rapid, accurate summary of progress¹.

Galaxy Book4

Galaxy Book4

Productivity at an unbeatable price.

Optimise every aspect of your working day with professional devices that work for every budget. The Galaxy Book4 is the heart of an exciting new range, designed for businesses of all sizes. It features all the amazing features and impressive specifications of the range, at a smaller price. It's ideal for outfitting entire teams, getting them into action at a moment's notice.

This seriously hard-working all-rounder of a business laptop comes with a 15.6" display for real portability and viewing comfort.

Precision never looked so elegant

See your work—and your favourite entertainment—at its best, from every angle.

Complete any workday task with even greater precision, using the Galaxy Book4's 15.6" screen. Whether you're logging onto an online data platform or losing yourself in the latest bingeable series, everything looks superb on the high-definition display. The anti-glare coating makes sure you've got a great view from any angle and, with a slim bezel, there's nothing to distract from the action.

Multi-task like a pro

Get all the power you need to take the stress out of your day-to-day tasks and calls.

Multi-task like never before, even when you're on a video call. The Galaxy Book4 is the ideal do-it-all laptop for everyday users. With the latest Intel® Core™ processors, the laptop ensures your workday is fuss-free. And when it's time to update the team on your progress, you can jump on a video call and keep working in the background, thanks to smart webcam auto-framing that will keep you centred throughout. Galaxy Book4 is proof great things come in small packages.

Copilot on call

Let your AI assistant take the wheel, so you can focus on what's really important.

Now you can do everything you've dreamed of in your workday, without breaking a sweat. Microsoft's AI assistant, Copilot, is ready to help you get it done.

With one tap, you can call up Copilot to complete a wide variety of tasks across the Microsoft 365 suite—whether that's writing a formal email, identifying patterns in big spreadsheets of data, or drafting a presentation in a matter of minutes¹.

1. Microsoft Copilot for Microsoft 365 subscription required.

Galaxy Book4

Stay supercharged, anywhere

Smart battery consumption ensures you're never left without charge for your travels.

When you're hopping between the commute, the office and long meetings, you need a battery you can rely on. You'll always have enough charge to get it done¹. And if you do start running low, you can plug in the universal charger for super-fast charging. That's a quick way to get back in action.

1. Typical value tested under third party laboratory condition. Rated minimum capacity of the Galaxy Book4 is 54Wh (Typical). Based on average use. Actual battery life varies by network environment, apps and functionality used, and other factors.

Professional looks, professional power

Plenty of portable processing power and smarts within elegant, slim hardware.

Big task landed on your lap? Deadline coming up fast? You can get it all done with your Galaxy Book4. With more than enough processing power to handle intense multi-tasking, you can run multiple productivity apps, take calls and get your admin done, all at the same time.

The Intel® Core™ 7/5 processor inside drives next-generation apps with ease. So, whether you're presenting to your hybrid working team or managing your inventory, you can be confident that your laptop can handle it.

The Galaxy Book4 is designed to look fantastic while pushing past the limits of laptop power. It's thin enough to slip into a work bag and carry anywhere, it's your key to anywhere productivity.

Business Use Case

Education top audience needs:
price, AI capabilities, performance, security

The perfect all-rounder laptop for teachers and learners on the go, for longer

Education budgets can go further when you choose the right devices. The well-rounded Galaxy Book4 benefits from the latest Intel® Core™ processor, unlocking solid performance for a great price. These sleek devices are perfect for those rushing through hallways to get to their next class. The Galaxy Book4 proves affordability doesn't have to come at the cost of quality.

Create inspiring content in the blink of an eye

Teachers can generate lesson content that engages and inspires, faster than ever. Microsoft Copilot gives education professionals the ability to create content on the fly. With a little help from AI, they can summarise lengthy online documents and reports, and tailor learning material for their students' exact needs¹.

Share that content via Quick Share

Teaching and learning have never been more connected, even far from the classroom. The Samsung Galaxy ecosystem works with existing education technology, enabling easy sharing of work to large digital displays and other classroom tools. Teachers can inspire and engage by enabling collaborative writing, drawing, calculating and playing.

Thanks to Quick Share on the Galaxy Book4, teachers and students can easily share their lecture materials and homework, securely and instantly². There's no risk of emails getting lost or dogs eating homework anymore.
