

Put the power of AI to work for you with SCC and HP

Work Doesn't have to feel like Work with HP AI PCs

HP's AI-enabled laptops and convertibles are designed to enhance productivity and user experience by integrating advanced artificial intelligence features. Below is a datasheet highlighting key aspects of these devices:

HP AI PC Portfolio

HP's AI PC portfolio is engineered to run AI functions, applications, and tools, enabling users to focus on their core tasks. Key benefits include:

- **Enhanced Performance:** Optimized to handle and even automate daily tasks more efficiently than standard PCs.
- **On-Device AI Processing:** Run AI applications directly on the PC without relying on cloud-based solutions, ensuring data privacy and reducing latency.

HP AI Companion

- An integrated suite of AI tools designed to boost productivity:
- **Discover:** Effortlessly explore new information, seek advice, generate creative ideas, or engage in conversations using AI-powered tools.
- **Analyze:** Interact with personal files to extract actionable insights, build custom libraries, compare documents, and draft summaries or reports.
- **Perform:** Optimize system performance by tailoring PC settings, receiving troubleshooting assistance, and ensuring smooth operation.

AI-Enhanced Conferencing

Elevate virtual meetings with high-resolution AI-enabled cameras and the Poly Camera Pro app:

- **Studio-Quality Streaming:** Deliver superior visual and audio quality from any environment.
- **AI Features:** Benefit from AI-enhanced lighting, auto-framing, auto-focus, and personalized settings to always look your best.
- **User-Friendly Setup:** Easily configure and save settings across multiple conferencing applications and cameras.

AI-Powered Presentation Coaching

Improve presentation skills with real-time, private AI feedback through Virtual Sapiens AI Coach:

- **Comprehensive Analysis:** Receive insights on body language, vocal cues, and verbal content to enhance communication.
- **Interactive Tools:** Utilize features like Presence Portal, AI Role Play, Simulated Conversations, and Practice Mirror for on-demand coaching.

Device Specifications

While specific models and configurations may vary, HP's AI-enabled laptops and convertibles typically feature:

- **Processors:** Intel® Core™ Ultra Processors designed to unlock AI experiences.
- **Display:** High-resolution touchscreens with options for OLED panels.
- **Memory and Storage:** Configurable RAM and SSD options to meet diverse performance needs.
- **Connectivity:** Support for the latest Wi-Fi standards and multiple ports for peripherals.

For detailed specifications of individual models, please refer to HP's official product pages.

Disclaimers

1. HP AI Companion is preloaded on select HP next-gen AI PCs or available for download from the Microsoft Store. It requires an HP next-gen AI PC with an NPU supporting 40-60 TOPS and Windows 11. Some features may require user-uploaded data.

2. The Poly Camera Pro app requires the myHP application and Windows OS.

3. Virtual Sapiens is a third-party app available for a limited time. Subscription and fees may apply. HP users participating in this campaign receive free access for two weeks. Continued access beyond the trial period requires a subscription.
