

IBM Cloudability

As a highly rated, TrustRadius award-winning product, IBM Cloudability has firmly established itself as a quality option for cloud cost management software buyers.

“Finally Cost Visibility for Engineers”

“We utilize IBM Cloudability to provide cost transparency to our engineers as to what their projects and applications are costing the company. Because all of our cloud spend files are budgeted and realized via a centralized cost center, a silo of information was created. With IBM Cloudability, engineers have near realtime insights into what projects are costing, what tags are missing, what can be optimized, and any reporting they can think of.”

Verified User | Manager in Information Technology | Banking, 1001-5000 employees

IBM Cloudability is a Great Cost Optimization Tool

“IBM Cloudability is a great tool to have as it provides analytics and recommendations that enable teams to continuously improve the economics of running cloud. [It offers] real-time transparency and insights to make faster, data-driven decisions. Get rid of time-intensive and error-prone manual processes.”

“Great tool for multicloud cost monitoring”

“We use IBM Cloudability as a comprehensive software solution that enables our org to effectively manage and optimize our multi-cloud costs across AWS, GCP, and Azure. Including detailed cost analysis, legacy product identification, customer cost assignment, cluster optimization, and automation of cost management processes, Cloudability helps our business to gain deep insights into our cloud spending, make informed decisions, reduce costs in initiatives, and focus on new product features for our AI Platform.”

8.3

Likelihood to renew

IBM Cloudability is rated a 8.3/10 for likelihood to renew in the cloud cost management category. This indicates that IBM Cloudability’s customers are satisfied, and likely to renew with Apptio as a cloud cost management solution.

“IBM Cloudability”

“We use IBM Cloudability for Budget Management purposes. It helps address problems such as budget tracking, encumbrances, and data uploads. IBM Cloudability helps address those issues because it allows us to see our budget data in a more organized scope. It also allows us to present our data for other Directors to view their own Departmental budgets.”

IBM Cloudability

“A good tool to manage cloud costs”

“The IBM Cloudability helps us manage the costs of the workloads and provides us with optimizations of the operation. It is also helpful for us in recurring analyses through its functions of anomaly alerts, reservation recommendations, etc. It enables the users to select cost-saving methods that meet the organization’s compliance requirements.”

Xiang Li | Director | nyit | Higher Education, 1001-5000 employees

In their TrustRadius reviews, the most common pros of IBM Cloudability were:

- Data management
- Cost visibility
- Transparency
- Integration capabilities

“Cloud cost optimization with IBM Cloudability”

““[IBM Cloudability is] very user-friendly and no need to special training is needed to use it. The predefined reports help to see the cost usage and find the resources with maximum cost and minimum cost very quickly.”

Vidyardhar Barge | Senior Manager | Jazz Pharmaceuticals | Biotechnology, 1001-5000 employees

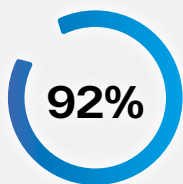

Key Insights

IBM Cloudability Key Insights

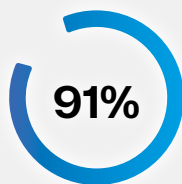

Would Buy Again

95% of TrustRadius reviewers said they would buy IBM Cloudability again.

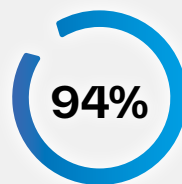

Happy with the Feature Set

92% of TrustRadius reviewers indicated being happy with IBM Cloudability's feature set.

Implementation went as expected

91% of TrustRadius reviewers said implementation of IBM Cloudability went as expected.

Delivers Good Value for the Price

94% of TrustRadius reviewers said IBM Cloudability delivers good value for the price.

Lived up to Sales and Marketing Promises

90% of TrustRadius reviewers stated that IBM Cloudability lived up to sales and marketing promises.
