

SCC circular IT with Apple Technology

Overview

SCC enables organisations to transform IT through a Circular IT approach, combining Apple technology with lifecycle-led services to reduce cost, carbon impact, and complexity. By utilising SCC's end to end life cycle capabilities for Apple technology, organisations can build a modern, sustainable, and high-performing digital workplace.

Why Apple?

Apple delivers a fully integrated platform where hardware, software, and services are designed together. This creates a seamless and consistent experience across devices, enabling productivity and simplifying IT operations.

- Platform consistency across macOS, iOS, and iPadOS simplifies deployment and management
- Built-in security at every level, including silicon, OS, apps, and network, protects data in transit and at rest
- Native integration with enterprise tools such as Microsoft 365, Exchange, and cloud storage platforms
- Zero-touch deployment
- Industry-leading accessibility features built into every device

Apple devices are engineered for longevity, with regular software updates and high-quality materials ensuring long usable life and strong residual value—making them ideal for circular IT models.

Why SCC?

SCC combines deep expertise in Apple technology with market-leading lifecycle services. From acquisition and deployment to management, refurbishment, and recycling, SCC provides a fully managed service aligned to business, financial, and sustainability objectives.

SCC Circular IT Approach

SCC replaces the traditional 'buy, use, dispose' model with a circular lifecycle strategy. This includes procurement, deployment, support, reuse, refurbishment, and responsible recycling.

By extending device life and maximising reuse, organisations can significantly reduce IT costs and carbon impact.

Lifecycle Capabilities

- Device procurement and financing solutions
- Zero-touch deployment and configuration
- Ongoing device management and support
- Secure data erasure and refurbishment
- Asset recovery, reuse, and resale
- Responsible recycling and ESG reporting

Business Benefits

- Reduced total cost of ownership
- Predictable, flexible IT spend
- Improved employee productivity and experience
- Enhanced security and compliance
- Measurable sustainability outcomes

SCC in Action for Apple

- By combining SCC's Circular IT services with Apple technology, organisations can:
- Deploy devices globally with minimal IT overhead
- Enable secure remote and hybrid working
- Maintain always-up-to-date, high-performance technology
- Recover and reinvest residual device value
- Align IT strategy with ESG and carbon reduction goals

SCC an Apple Business Partner delivers a smarter approach to IT, where performance, security, sustainability, and financial control are built in from day one. This joined-up strategy enables organisations to move beyond linear IT and unlock long-term value from their technology investments.
